Hear Every Peep.

The Motorola MBP21 is an Audio Monitor that uses DECT technology to keep you connected to your baby, without interfering with your Wi-Fi® frequency. Roam around the house without losing connection, with up to 1,000ft (300m) range, and receive alerts when you're out-of-range or the battery is low. Never miss a peep with the high sensitivity microphone, so you know when your baby is awake, plus you can control the volume levels from the parent unit or your mobile device. Monitor what matters.

motorola

Features

- DECT wireless connectivity
- Wi-Fi® friendly
- Up to 1,000ft (300m) range¹
