

## travel potty

1. Unfold legs and push up toward rim so that they click into place.

**IMPORTANT:** You will hear a definite click for stability, all 4 hinges must be clicked into position.

2. Place liner inside potty with absorbent pad facing upwards. Hook liner handles over the potty legs.

3. Position child on the potty so that raised rim is at the front and back.

### After Use

1. After use, unhook handles and tie together to make an air tight seal and dispose of as you would any disposable diaper.

2. Attach a new liner immediately so that it is ready for future use (you can fit up to 3 liners at once).

3. Unlock potty legs and fold up. Place in storage bag.

## trainer seat

1. Unfold the legs fully until they are in a horizontal position until a click is felt. Your trainer seat is now ready to use.

2. Position the POTETTE trainer seat with both legs flat on the front half of the adult toilet seat.

The legs have a non slip surface in contact with the toilet seat to ensure security and provide safety with comfort.

3. When finished simply fold back the legs and place into storage bag.

**CAUTION:** - Always supervise child when using portable potty. Never leave your child unattended. This product is not a toy.

**WARNING:** - Plastic bags can be dangerous. To avoid danger of suffocation the re-usable bag and the liners should be kept away from babies and children.

Please keep these instructions for future reference.
